

## Waste centre

LIKE Geoff Mitchelmore and Isabel Price, I, too, am yet to find an Altona resident who supports the Innova Soil Technology waste treatment centre at the Dow Chemical site.

The only "consultation" with residents to date has been via this newspaper.

Innova press releases describe the process as being environmentally safe and simple. If that's the case, then arguably it could go anywhere. What about the eastern suburbs? The CBD?

For close to 50 years, the Altona Chemical Complex companies and residents have suffered from poor planning and

lack of adequate buffer zones. Locating Innova at Dow only perpetuates this long-term problem.
